## Product Description

### 5\*5cm Reusable Self Adhesive Electrode Pads For Ems Electric Muscle Tens Unit

#### Product Description:

Our Tens electrodes are made with a flexible design that conforms to the body's natural curves and movements. This ensures a comfortable and secure fit, even during physical activity. The gel adhesive on our pads also ensures that they stay in place and do not slip or slide during use. The jack diameter of  $\Phi 2.0\text{mm}$  is compatible with most Tens units, making them a versatile addition to your pain management routine.

Our Tens electrode pads are perfect for those suffering from chronic pain, muscle tension, or soreness. They are a non-invasive and drug-free solution to pain relief, providing a safe and effective alternative to traditional pain management methods. With our reusable design, you can enjoy the benefits of Tens therapy whenever you need it, without having to constantly purchase new pads.

Our electrode tens pads are easy to use and maintain. Simply apply the pads to the desired area of the body, connect them to your Tens unit, and adjust the intensity level to your preference. After use, gently remove the pads and store them in a cool, dry place for future use. With proper care and maintenance, our Tens electrodes can provide you with pain relief for years to come.

Don't let pain and discomfort hold you back from enjoying your daily activities. Invest in our Tens electrode pads today and experience the benefits of Tens therapy for yourself. Our pads are a safe, effective, and affordable solution to pain management that you can rely on.

#### Features:

#### Applications:

**Pain Relief:** The Tens electrode pads can be used to alleviate pain caused by various conditions, including arthritis, sciatica, and fibromyalgia. They can also be used to relieve muscle soreness and tension.

**Physical Therapy:** These electrode pads are commonly used in physical therapy to help patients recover from injuries and surgeries. They can be used to stimulate muscles, reduce inflammation, and increase blood flow to the affected areas.

**Sports Performance:** Athletes can use these electrode pads to enhance their performance and speed up their recovery time. They can be used to warm up muscles before a workout, reduce muscle fatigue during exercise, and promote muscle recovery after a workout.

**Chronic Illness Management:** Patients with chronic illnesses such as multiple sclerosis, Parkinson's disease, and cerebral palsy can use these electrode pads to manage their symptoms. They can be used to reduce muscle stiffness, improve range of motion, and alleviate pain.

**Relaxation:** The Tens electrode pads can also be used for relaxation purposes. They can be used to promote deep relaxation, reduce stress and anxiety, and improve sleep quality.

Overall, the Janejoy J01 Tens electrode pads are a versatile product that can be used in a variety of settings and for various applications. Their self-adhesive design and gel adhesive ensure that they stay securely in place, providing optimal performance. Whether you need pain relief, physical therapy, sports performance enhancement, chronic illness management, or relaxation, these electrode pads are an

excellent choice.
