Product Description

95% Cotton And 5% Spandex Kinesiology Sports Tape - Drug Free Adhesive With 5N Strength

Product Description:

Our Kinesiology tape is made with 95% cotton and 5% spandex, which makes it comfortable to wear and gentle on the skin. It is also latex-free, making it safe for those who have latex allergies. The adhesive strength of our tape is 5N, which means it can hold up under pressure and movement without slipping or peeling.

Breathability is also an important feature of our Kinesiology tape. The tape is designed to allow air and moisture to penetrate through it, which helps prevent skin irritation and allows the skin to breathe. This makes our Kinesiology tape a great choice for those with sensitive skin.

Our Kinesiology tape is easy to apply and can be used on various body parts such as the shoulders, knees, back, and ankles. It can help alleviate pain and discomfort caused by injuries, muscle strains, and joint pain. It can also improve circulation and reduce inflammation, which can speed up the healing process.

Our Kinesiology tape is also water-resistant, which means it can withstand sweat and water exposure during physical activities. It is durable and can last up to 5 days, depending on the level of activity and movement.

In summary, our Kinesiology tape is a versatile and effective tool for athletes and active individuals who need support, pain relief, and flexibility during physical activities. Its elasticity ratio, breathability, material, adhesive strength, and latex-free features make it a top choice for those who need a reliable and comfortable tape.

Features:

Product Name: Kinesiology Tape

Adhesive Strength: 5N

Stretchability: 140%

Application Method: Roll-on

Gel: Acrylic

Sample: Free

Keyword: Muscle tape

Keyword: Sport tape

This is a technical parameter table for Kinesiology Tape, which is also known as muscle tape or sports tape.

Applications:

The Janejoy Kinesiology Tape features an acrylic gel that provides excellent adhesion and support to the muscles and joints. Its waterproof and breathable material makes it convenient for usage during workouts, swimming, or other physical activities. The tape's roll-on application method allows for easy and precise placement, ensuring that the targeted muscles receive the necessary support and relief.

Whether you're an athlete looking to prevent injuries or a patient recovering from an injury, the Janejoy Kinesiology Tape is an excellent choice. Its latex-free material makes it suitable for individuals with sensitive skin or latex allergies. This muscle tape is versatile and can be used for a variety of conditions, including but not limited to:

Shoulder pain

Knee pain

Back pain

Elbow pain
Ankle sprains
Wrist pain

The Janejoy Kinesiology Tape is also suitable for various sports and activities, including running, cycling, weightlifting, and yoga. It provides support and stability to the muscles and joints, allowing you to perform at your best and reduce the risk of injury. Additionally, the tape's waterproof and breathable material makes it suitable for use during water sports such as swimming and surfing.

In conclusion, the Janejoy Kinesiology Tape is a reliable and effective product that can help individuals with sports and rehabilitation needs. Its acrylic gel, waterproof and breathable material, roll-on application method, and latex-free attributes make it easy and convenient to use. Whether you're an athlete or a patient, this muscle tape can provide the support and relief you need to perform at your best and recover from injuries quickly.

Customization:

Customize your Janejoy Kinesiology Tape (Model Number: J02) with our product customization services. Our tape is made from 95% cotton and 5% spandex, making it comfortable and flexible for athletes of all levels. With a width of 5cm, it provides ample coverage for various body parts.

Our kinesiology tape is manufactured in China and has a stretchability of 140%, allowing for a wide range of motion during physical activities. It also has an adhesive strength of 5N, ensuring it stays in place during even the most intense workouts. With a durability of 5-7 days, it can withstand multiple uses without losing effectiveness.

Whether you need sport tape for injury prevention or recovery, our kinesiology tape is a reliable option for all your athletic needs. Contact us today to learn more about our product customization services.

Support and Services:

The Kinesiology Tape product is designed to provide support and pain relief for various muscles and joints throughout the body. Our technical support team is available to answer any questions you may have regarding the use and application of the tape. In addition, we offer a variety of services to ensure that our customers receive the best possible experience, including:

Detailed instructional videos and guides

Expert training and education programs

Customized support for specific needs and concerns

Regular updates and improvements to the product

Our goal is to help you achieve your health and fitness goals by providing high-quality products and exceptional customer service.

Packing and Shipping:

Product Packaging:

The Kinesiology Tape comes in a sealed plastic pouch with a product label and instructions for use included. The pouch is then placed in a cardboard box for added protection during shipping.

Shipping:

The Kinesiology Tape is shipped in a secure and durable cardboard box. It is shipped through a reliable courier service and a tracking number is provided to the customer for easy monitoring of the delivery status.

FAQ:

Q: What is Janejoy Kinesiology Tape?

A: Janejoy Kinesiology Tape (Model J02) is a therapeutic tape designed to support and stabilize muscles and joints during physical activity. It is made of high-quality cotton with a hypoallergenic adhesive that is gentle on the skin.

Q: Where is Janejoy Kinesiology Tape made?

A: Janejoy Kinesiology Tape (Model J02) is made in China with strict quality control measures to ensure the highest level of performance and safety.

Q: How do I apply Janejoy Kinesiology Tape?

A: To apply Janejoy Kinesiology Tape (Model J02), first clean and dry the area of skin where you will be placing the tape. Cut the tape to the desired length and shape, then gently apply it to the skin, following the natural contours of the body. Be sure not to stretch the tape too much, as this can cause discomfort or restrict movement.

Q: How long can I wear Janejoy Kinesiology Tape?

A: Janejoy Kinesiology Tape (Model J02) is designed to stay on the skin for up to 5 days, even during physical activity or showering. However, the exact wear time may vary depending on individual skin type and activity level.

Q: Is Janejoy Kinesiology Tape safe to use?

A: Yes, Janejoy Kinesiology Tape (Model J02) is safe to use for most people. However, if you have sensitive skin or a skin condition, it is recommended to test a small area of skin before using the tape. If you experience any discomfort or irritation while wearing the tape, remove it immediately and consult a healthcare professional.
