Product Description

140% Stretch Medical Kinesiology Tape With Acrylic Gel

Product Description:

The elasticity ratio of this Kinesiology tape is $1:2\pm0.3$, which means that it can stretch up to twice its original length without losing its shape or adhesive properties. This feature makes it an ideal choice for athletes who need a durable and reliable muscle tape that can keep up with their intense training and performance.

The Kinesiology tape comes with a free sample, allowing you to test it out before making a purchase. This way, you can see how it works for your body and determine if it is the right sport tape for you. The free sample also gives you the opportunity to try out different application methods and techniques to find the one that works best for you.

This muscle tape is designed to last for 5-7 days, providing long-lasting support and pain relief to your muscles and joints. It is a great choice for athletes who need a reliable and durable tape that can withstand intense physical activity and sweat.

The Kinesiology tape is easy to apply with its roll-on application method. Simply roll it onto the affected area and apply gentle pressure to activate the adhesive. You can also use it to wrap around joints or muscles to provide additional support and stability.

In summary, if you are an athlete or someone who participates in physical activity regularly, the Kinesiology tape is an ideal choice for you. Its stretchability, elasticity ratio, free sample, durability, and roll-on application method make it a reliable and effective muscle tape to support your body during physical activity.

Features:

Product Name: Kinesiology Tape

Stretchability: 140%

Latex-Free: Yes

Elasticity Ratio: $1:2\pm0.3$

Sample: Free

Material	95% Cotton and 5% Spandex
Sample	Free
Length	5m
Durability	5-7 Days
Adhesive Strength	5N
Elasticity Ratio	$1:2\pm0.3$

Applications:

One of the primary uses of kinesiology tape is in sports. Athletes often use sport tape to support and protect their muscles during training and competition. The Janejoy Kinesiology Tape is an excellent option for this purpose, as it can be applied to various parts of the body, such as the knees, shoulders, and back. It can also help reduce muscle fatigue and soreness, allowing athletes to perform at their best.

Another common use for muscle tape is in physical therapy. Patients recovering from injuries or surgeries can benefit greatly from kinesiology tape. The tape can be used to improve circulation, reduce inflammation, and provide support to weakened muscles and joints. The Janejoy Kinesiology Tape is an excellent option for physical therapy patients due to its comfortable and stretchy material.

Kinesiology tape can also be used in everyday situations. For example, people with poor posture can use muscle tape to help improve their alignment and reduce discomfort. Additionally, individuals who work in physically demanding jobs, such as construction workers or nurses, can use the tape to support their muscles and reduce fatigue.

In summary, the Janejoy Kinesiology Tape is a versatile and beneficial product that can be used in a variety of situations. Its high stretchability and adhesive strength make it an excellent option for athletes and physical therapy patients. Additionally, its comfortable material makes it a great choice for everyday use.

Customization:

Support and Services:

Our Kinesiology Tape product comes with comprehensive technical support and services to ensure that you get the most out of your purchase. Our team of experts is available to assist you with any questions or concerns you may have about the product, including:

- Application techniques

The container includes instructions for use and precautions.

The tape roll is neatly wrapped and secured inside the container to prevent unraveling during shipping.

The container is labeled with the product name, size, and color for easy identification.

Shipping:

The Kinesiology Tape is shipped in a padded envelope or box to prevent damage during transit.

The container is sealed with tape to prevent it from opening during shipping.

The package includes a packing slip with the customer's order information.

The package is labeled with the shipping address and tracking information for easy tracking.

FAQ:

Q: What is Janejoy Kinesiology Tape?

A: Janejoy Kinesiology Tape is a therapeutic tape designed to support muscles and joints during physical activity. It is made of high-quality cotton material and features a hypoallergenic adhesive that is gentle on the skin.

Q: What conditions can Janejoy Kinesiology Tape be used for?

A: Janejoy Kinesiology Tape can be used to treat a variety of musculoskeletal conditions, including sprains, strains, and muscle fatigue. It can also be used to provide support and stability to weak or injured joints.

Q: How do I apply Janejoy Kinesiology Tape?

A: To apply Janejoy Kinesiology Tape, first clean and dry the area of skin where the tape will be applied. Then, cut the tape to the desired length and shape. Remove the backing from the tape and apply it to the skin, being careful not to stretch the tape too much. Rub the tape gently to activate the adhesive.

Q: Is Janejoy Kinesiology Tape waterproof?

A: Yes, Janejoy Kinesiology Tape is waterproof and can be worn during swimming and other water activities.

Q: Where is Janejoy Kinesiology Tape made?

A: Janejoy Kinesiology Tape is made in China.
